Release Notes

Patch DVBA*2.7*192

September 2015

Department of Veterans Affairs
Office of Enterprise Development

Preface

Purpose of the Release Notes

The Release Notes document describes the enhancements and/or defects addressed in Patch DVBA*2.7*192.

Reference Numbering System

This document uses a numbering system to organize its topics into sections and show the reader how these topics relate to each other. For example, section 1.3 means this is the main topic for the third section of Chapter 1. If there were two subsections to this topic, they would be numbered 1.3.1 and 1.3.2. A section numbered 2.3.5.4.7 would be the seventh subsection of the fourth subsection of the fifth subsection of the third topic of Chapter 2. This numbering system tool allows the reader to more easily follow the logic of sections that contain several subsections.

1 Overview

The main purpose of this patch is to release a new version of the Compensation & Pension Record Interchange (CAPRI) Graphical User Interface (GUI) that includes defect fixes and enhancements to the user interface to support user interface modifications.

CAPRI GUI v192 and patch (DVBA*2.7*192) provide defect fixes and enhancements for the CAPRI GUI and the Automated Medical Information Exchange (AMIE) package.

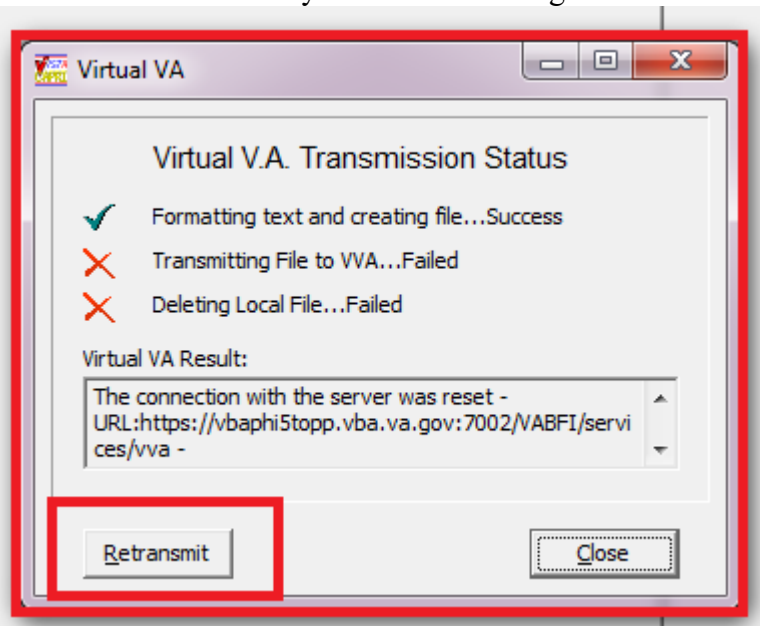

The information contained in this document is not intended to replace the CAPRI GUI User Manual. The software defects and enhancements are briefly discussed so that readers are aware of high level functional changes. The CAPRI GUI User Manual should be used to obtain detailed information regarding specific functionality.

2 Customer – Veterans Health Administration (VHA)

2.1 Enhancements

2.1.1 Provide retransmit capabilities when transmission to Virtual VA (VVA) fails – Virtual VA Transmission Status screen

When transmission fails to Virtual VA (VVA), either during auto-transmission, manual transmission (**Transmit to Virtual VA**), or via Report Builder (**Send to Virtual VA**), the user will now have the ability to retransmit using the “**Retransmit**” button.

****Please Note:** The “**Retransmit**” button is only available when the transmission fails; otherwise, this button will not be displayed.

2.1.2 Modifications to CAPRI Contract Referral (CCR) functionality

1. CAPRI CCR has been modified to no longer display **Email Address** on the “Contractor Editor Screen”. This screen is accessible from **Tools|CAPRI Contract Referral (CCR) |Admin Tools|Add/Edit Contractors**.

The image shows a screenshot of the "Contractor Editor" dialog box. The dialog has a title bar with the CAPRI logo and the text "Contractor Editor". Inside the dialog, there is a "Contractor:" dropdown menu with "CHS" selected. Below this is a section titled "Contractor Information" containing three fields: "Name:" with a text box containing "CHS", "Status:" with a dropdown menu showing "Active", and "Remote SFTP:" with a dropdown menu showing "CHS (Test Claims)". At the bottom of the dialog are four buttons: "New", "Save", "Cancel", and "Close".

5.1 Defects

5.1.1 Remedy ticket - INC000001008110 - CAPRI - Other: Des Moines insufficient exam error (Duplicate: INC000001303460)

Problem:

While running the Detailed Insufficient Exam report in CAPRI, if the first record identified in the specified data range has an original 2507 EXAM (#396.4) record without a DATE OF EXAM (#.06), the current logic fails to set the variable DVBADTE which is used to display the date in an external format leading to an undefined error.

Solution:

The Insufficient Exam report has been modified as follows and will no longer display an error. Prior to displaying the report, the code will verify the DVBADTE set and instances where it is not, it will be set to null which essentially displays a blank for that value rather than resulting in an undefined error.

5.1.2 Remedy ticket - INC000001249163 - The "Cytology" or "Surgical Path" report – DoD tab

Problem:

While running the "Cytology" or "Surgical Path" report from the **DoD tab**, if the date range for the report produces more than two records, selecting the third record or below will cause CAPRI to go into an endless loop and freeze.

Solution:

CAPRI has modified the record parsing logic so it will no longer go into an endless loop and freeze when the date range produces more than two records. All Cytology and Surgical Path records will be displayed and accessible.

5.1.3 Remedy ticket - INC000001305051 - CAPRI patch 190 has apparently broken the mouse scroll wheel (Duplicate: INC000001302423)**Problem:**

CAPRI patch 190 broke the usage of the mouse scroll wheel in the Exam Details, “**Exam Results**” window.

Solution:

CAPRI has been modified to allow the usage of the mouse scroll wheel in the “**Exam Results**” window instead of the “**Exam Details**” window.
