# Introduction

The Mental Health Technical Manual V. 5.01 is designed as a reference manual to provide a technical description of the Mental Health package for the Department of Veterans Affairs Medical Center (VAMC) Information Resource Management Service (IRMS), Automated Data Processing Application Coordinators (ADPAC), and Clinical Coordinators. For more information regarding options and menus, please see the Mental Health User Manual V. 5.01.

## Overview

The Mental Health V. 5.01 package is designed to provide a means of rapidly gathering, storing, and reporting clinical information for patients receiving mental health treatment and /or assistance with vocational issues. The clinical information stored in the VistA database is readily accessible to clinical staff throughout the various Mental Health Treatment Service areas and other clinics in the Medical Center. It can also be sent to enterprise storage facilities such as the Austin Information Technology Center (AITC).

## Software and Manual Retrieval

The following software and documentation files represent the current graphical interface for Mental Health Assistant (patch YS\*5.01\*123):

File Name	Contents	Format
YS_501_123.ZIP	MHA GUI and supporting files	Binary
YS_501_123.KID	MHA Server Components	ASCII
YS_501_123_IG.PDF	MHA Deployment, Installation, Back-Out, and Rollback Guide	Binary
YS_MHA_UM.PDF	MHA User Manual	Binary
YS_MHA_TM.PDF	Mental Health Technical Manual /Security Guide	Binary

Use Secure File Transfer Protocol (SFTP) and the following address to connect to the first available FTP server: **download.vista.med.va.gov**

The software files are also available via SFTP on the following OI Field Office [ANONYMOUS.SOFTWARE] directories:

OIFO	FTP Address	Directory
Hines	fo-hines.med.va.gov	anonymous.software
Salt Lake City	fo-slc.med.va.gov	anonymous.software

# VistA Intranet

Refer to the Web sites listed below when you want to receive more background and technical information about the Mental Health package v 5.01, and to download this manual and related documentation.

Online Documentation for this product is available at the VA Software Document Library:

<https://www.va.gov/vdl/>

This website provides a listing of all the software manuals for VistA. Search on “health”:

## 2. Search for an application:

Application Name

health	×	Search
--------	---	--------

Then, click on **Mental Health**; it will take you to the Mental Health v 5.01 documentation.

## Screen Displays

Before installing Mental Health package v 5.01, review this section to learn the many conventions used throughout this guide.

- **Keyboard Responses:** Keys provided in boldface, within the copy, help you quickly identify what to press on your keyboard to perform an action. For example, when you see **enter** in the copy, press this key on your keyboard.
- **Screen Captures:** Provide “shaded” examples of what you will see on your computer screen, and possible user responses. The computer dialogue appears in Courier font.
- **Notes:** Provided within the steps describe exceptions or special cases about the information presented. They reflect the experience of our staff, developers, and testers.

**Note:** This *boxed* element highlights special details about the current topic.

- **Other Names:** File and field names, and Security keys provided in uppercase. For example, you may select a patient's name from the PATIENT file (#2).
- **Menu Options:** Provided in italics. For example, you may establish Electronic Signatures Codes using the Kernel Electronic Signature code Edit [XUSESIG] option.

# Implementation & Maintenance

## Minimum Requirements

Before installing Mental Health package v 5.01, make sure that your system includes the following Department of Veterans Affairs (VA) software packages and versions (those listed or higher).

Application Name	Minimum Version Needed
CPRS	31 A
Clinical Reminders	2.0
Kernel	8.0
RPC Broker	1.1
PIMS	5.3
VA FileMan	22.2
Mailman	8.0

## Routines and Checksums

The Calculate and Show Checksum Values [XTSUMBLD-CHECK] menu option can be used as shown below to display a list of checksums for Mental Health package V. 5.01. The Mental Health routines are in the YS\* and YT\* namespaces.

Select Programmer Options Option: Calculate and Show Checksum Values  
This option determines the current Old (CHECK^XTSUMBLD) or New (CHECK1^XTSUMBLD) logic checksum of selected routine(s).

Select one of the following:

- 1 Old
- 2 New

New or Old Checksums: New// 2 New

New CheckSum CHECK1^XTSUMBLD:

This option determines the current checksum of selected routine(s).

The Checksum of the routine is determined as follows:

1. Any comment line with a single semi-colon is presumed to be followed by comments and only the line tag will be included.
2. Line 2 will be excluded from the count.
3. The total value of the routine is determined (excluding exceptions noted above) by multiplying the ASCII value of each character by its

position on the line and position of the line in the routine being checked.

Select one of the following:

P      Package

B      Build

Build from: Package

All Routines? No => <ret> No

Routine: YS\*

Routine: YT\*

## Routine Descriptions

To obtain a brief description for all Mental Health routines, use the First Line Routine Print [XU FIRST LINE PRINT] menu option. Including the second line in the report will show which patches have made changes to the routine. This menu option is part of Programmer Options [XUPROG] on the Routine Tools [XUPR-ROUTINE-TOOLS] menu.

## Files

## Pointer Relations

Use the Map Pointer Relations [DI DDMAP] option to create a visual representation of the file pointer relationships.

## Exported Options

The menu and options exported by the Mental Health package V. 5.01 are located in the YS\* and YT\* namespaces. Individual options can be viewed by using the Kernel option XUINQUIRE (Inquire).

## Mental Health Menu Distributions

The following is a display of the options in the Mental Health V. 5.01 package.

### Mental Health [YSUSER] Menu

The Mental Health [YSUSER] menu is the Mental Health package primary menu. This menu contains two options.

After you select the Mental Health [YSUSER] menu, you will see a display similar to the one below. Assignment of privileges will determine what options are available for your use.

```

** Mental Health version 5.01 **

1      Clinical Record ...
6      Global Assessment of Functioning ...

```

Each of the options listed submenus that lead to other options and menus. These are described below.

**NOTE: Functionality within some options is controlled by security keys. See the Security Key section for a complete description of the keys.**

## Clinical Record [YSCLINRECORD]

The Clinical Record [YSCLINRECORD] menu includes options and menus that allow you to access and input patient data.

```

*** MENTAL HEALTH ***

```

## CLINICAL RECORD

- 3       Diagnosis ...
- 13      Seclusion/Restraint ...

### Diagnosis [YSDIAG]

- 1       Enter Diagnosis
- 2       Print Diagnoses
- 3       Print DXLS History

### Seclusion/Restraint [YSSR SEC/RES]

The Seclusion/Restraint [YSSR SEC/RES] menu includes options for information regarding seclusion/restraint. If there are patients in the Seclusion /Restraint files, you will see the following heading above the menu.

The following patient(s) are currently listed as being in Seclusion/Restraint:

PATIENT	SSN	DATE & TIME INITIATED	ORDERED BY	TOTAL TIME
=====				
YSPATIENT,ONE	xxxx	* JAN 21, 2012@14:42	YSPROVIDER,ONE	2400:7

\* Written order required.

- 1       Entry of Patient to Seclusion/Restraint
- 2       Release of Patient from Seclusion/Restraint
- 3       Fifteen-Minute Check
- 4       **Seclusion/Restraint Report Utilities ...**

## Seclusion/Restraint Report Utilities [YSSR REPORTS]

The Seclusion/Restraint Report Utilities [YSSR REPORTS] menu includes options to display Seclusion/Restraint information in various formats.

- 1 MONTHLY..Monthly Report (VA Form 10-2683)
- 2 PATIENT..S/R Mgmt Report by Patient Episode
- 3 DATE.....S/R Mgmt Report by Date
- 4 NURSING..S/R Mgmt Report by Nursing Shift
- 5 REVIEW...S/R Mgmt Report of Review Actions
- 6 WARD.....S/R Mgmt Ward Report

## Global Assessment of Functioning

**Note:** The use of Global Assessment of Functioning (GAF) has been discontinued.

The Global Assessment of Functioning [YSGAF MAIN] menu is the top menu to enter, graph and print GAF scores. These scores are equivalent to the DSM IV Axis 5 diagnosis.

- 1 Enter GAF by Clinic Visit (discontinued)
- 2 Print GAF's by Clinic/Date
- 3 Single Patient GAF Entry (discontinued)
- 4 Historical GAF listing
- 5 Edit/mark errors on GAF (discontinued)

## MHS Manager

The MHS Manager [YSMANAGER] menu is exported with the Mental Health package; it is typically assigned to a user's secondary menu. This menu provides managerial utilities such as the Psychological Test Utilities that should be assigned only to individuals who are responsible for maintaining the Mental Health software.

\*\*\* MENTAL HEALTH \*\*\*  
MHS MANAGER FUNCTIONS

- 2 Mental Health System site parameters ...
- 3 MHA2 Psych test utilities ...
- 5 Seclusion/Restraint Management Utilities ...
- 7 MHA3 Utilities ...

## Mental Health System site parameters

The Mental Health System site parameters [YS SITE PARAMETERS] menu includes options for use by the Mental Health Application Coordinator. Through it, site-specific files are maintained by the coordinator.

```
REASONS.....Edit S/R Reasons File
CATEGORY.....Edit S/R Category File
RELEASE.....Edit S/R Release Criteria File
ALTERNATIVES.Edit S/R Alternatives File
CHECKLIST....Edit S/R Checklist File
INSTRUMENT...Edit Instrument Restart Day Limit
```

## MHA2 Psych test utilities

The MHA2 Psych test utilities [YSUTIL] menu includes options to access the psych testing utilities options. This is a legacy option and does not affect MHA3.

```
*** LEGACY Mental Health ***
MHA2 Utilities
```

- 2 Audit test/interview data
- 3 Check Psych Data Base
- 6 Delete Patient Data
- 7 Print test/interview items
- 8 Delete incomplete tests/interviews

## Seclusion/Restraint Management Utilities

Seclusion/Restraint Management Utilities [YSSR MGT UTILITY] menu contains options required for the management of the Seclusion/Restraint features.

- ```
MHS Manager Functions
```
- 1 Review of Seclusion/Restraint Action
  - 2 Written Order Edit
  - 3 Edit Seclusion/Restraint Entry
  - 4 Delete Seclusion/Restraint Entry

## MHA3 Utilities

The MHA3 Utilities [YTQ MHA3 MENU] menu includes options for MHA3 settings and utilities.

```
*** Mental Health ***
    MHA3 Utilities
```

- 1 Print Test Form
- 2 Detailed Definition
- 3 Delete Patient Data
- 4 Stop/Re-Start Progress Notes for an Instrument
- 5 Exempt Test
- 6 Test Usage
- 7 XML Output
- 8 Instrument Exchange

## Menu Diagrams

The options comprising the Mental Health package are arranged on menus according to functionality. The Mental Health [YSUSER] option is used by most Mental Health package users. The MHS Manager [YSMANAGER] menu is for supervisors. Use the Menu Diagrams [XQDIAGMENU] option to create a visual representation of the menu structure.

## Mental Health Protocols (file #101):

|                   |                      |
|-------------------|----------------------|
| YS GAF            | YS GAF A08 SERVER    |

| YTXCHG CREATE ENTRY                          | Create New Entry         |
| YTXCHG DELETE ENTRY                          | Delete Entry             |
| YTXCHG DRYRUN                                | Trial Install <Dry Run>  |
| YTXCHG INSTALL                               | Install Exchange Entry   |
| YTXCHG LOAD HOST                             | Load Host File           |
| YTXCHG LOAD URL                              | Load from URL            |
| YTXCHG MAIN MENU                             | Instrument Exchange Menu |
| YTXCHG REBUILD ENTRY                         | Rebuild Entry            |
| YTXCHG SAVE HOST                             | Create Host File         |

## Remote Procedure Calls

The Mental Health V. 5.01 Remote Procedure Calls (RPC'S) are in the YS\* and YT\* namespaces. Use the FileMan Print functionality to find and display the entries in the REMOTE PROCEDURE file (#8994).

## Database Integration Agreements

To view the details of a Database Integration Agreements (DBIA) use the VA Forum option “Inquire to an Integration Control Registration” to display the DBIAS where the Mental Health package is the custodial or the subscribing package.

## External Relations

The VistA Mental Health Assistant (MHA) is the graphical user interface (GUI) for the VistA Mental Health package. MHA was developed to create an effective and efficient tool for all clinicians and their patients to use for the administration and scoring of assessment instruments and interviews. Additionally, results are displayed in report and graphical formats. MHA supports mental health assessments (e.g., psychological testing, structured interviews, questionnaires, etc.) that are not available elsewhere in the Computerized Patient Record System (CPRS)/Veterans Information System and Technology Architecture (VistA).

To better meet the needs of clinicians and patients in different treatment programs, particularly in non-traditional settings, MHA can now be run in a standalone mode to administer instruments offline for later uploading to VistA. For detailed instructions and requirements installing and implementing the MHA Graphical User Interface (GUI) software application, see the MHA3 Installation Guide.

## Non-M Software Distributed with Mental Health Assistant 3 (MHA3)

Here are typical examples of the storage locations for the MHA3 files (executable, DLL, and other supporting files) installed on a workstation:

C:\Program Files (x86)\Vista\YS\MHA3

|                 |                         |
|-----------------|-------------------------|
| borlndmm.dll    | (Product Version 22.0)  |
| YS_MHA.exe      | (File Version 1.0.3.75) |
| YS_MHA Help.chm |                         |

C:\Program Files (x86)\Vista\Common Files

|                  |                        |
|------------------|------------------------|
| YS_MHA_A_XE8.dll | (File Version 1.0.5.6) |
| YS_MHA_AUX.dll   | (File Version 1.0.3.4) |

MHA3 Patch YS\*5.01\*123 exports the following files:

| FILE NAMES        | CONTENTS                                                                                                                                                                                       | RETRIEVAL FORMATS |
|-------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|
| borIndmm.dll      | DLL used by Delphi applications. Installed in same directory as YS_MHA.exe.<br><br>Product Version 22.0                                                                                        | BINARY            |
| YS_MHA.exe        | MHA3 Executable<br><br>File Version 1.0.3.75                                                                                                                                                   | BINARY            |
| YS MHA Help.chm   | MHA3 Help File                                                                                                                                                                                 | BINARY            |
| YS_MHA_AUX.dll    | Required by YS_MHA.exe. This DLL scores complex instruments and is deployed to "C:\Program Files (x86)\Vista\Common Files"<br><br>File Version 1.0.3.4                                         | BINARY            |
| YS_MHA_A_XE8.dll  | Required by CPRS to launch instruments from Reminder Dialogs. It typically resides in the same directory as CPRS or in "C:\Program Files (x86)\Vista\Common Files"<br><br>File Version 1.0.5.6 | BINARY            |
| YS_501_123.ZIP    | Contains the files listed above; the MHA executable and supporting files for YS*5.01*123                                                                                                       | BINARY            |
| YS_501_123.KID    | MHA Server Components (KIDS Build)                                                                                                                                                             | ASCII             |
| YS_501_123_IG.PDF | Mental Health Assistant Version 3 (MHA3) Installation Guide for Patch YS*5.01*123                                                                                                              | BINARY            |
| YS_MHA_UM.PDF     | Mental Health Assistant Version 3 (MHA3) User Manual                                                                                                                                           | BINARY            |
| YS_MHA_TM.PDF     | Mental Health Version 5.01 Technical Manual                                                                                                                                                    | BINARY            |

#### **Mental Health Remote Procedure Context Option**

The OPTION file (#19) entry “**YS BROKER1 version 1.0.3.75~1.0.5.6~1.0.3.75**” [YS BROKER1] provides the context necessary to interface the **VistA** Mental Health Assistant Version 3 application to the VistA database via Remote Procedure Calls (RPCs).

## MHA3 Server Options

The server options being used in the Mental Health package V. 5.01:

### **Clozapine Data Server [YSCLSERVER]**

DESCRIPTION: This is a server to allow the National Clozapine Coordinating Center (NCCC) in Dallas to authorize Clozapine registration numbers for use at individual sites.

ROUTINE: YSCLSERV

SERVER ACTION: RUN IMMEDIATELY

### **Mental Health Test Usage Server [YS TEST USAGE]**

DESCRIPTION: Used by the National Mental Health Strategic Healthcare Group to determine the annual psychological test usage by site. This option reports the number of each test by station within any given time period.

The MAILMAN message must be in FILEMAN date format 3031001^3040930

ROUTINE: YSTUSE

SERVER ACTION: RUN IMMEDIATELY

### **Server test usage MHA3 stats [YTQTUSE]**

DESCRIPTION: \*\*\* MHA3 \*\*\* Used by the National Mental Health Strategic Healthcare Group to determine the annual psychological test usage by site. This option reports the number of each test by station within any given time period.

The MAILMAN message must be in FILEMAN date format 3031001^3040930

ROUTINE: YTQTUSE

SERVER ACTION: RUN IMMEDIATELY

## Remote Systems

As of patch YS\*5.01\*119, Global Assessment of Functioning (GAF) scores entered through the Mental Health GAF form are no longer sent to the National Patient Care Database (NPCD) at the Austin Information Technology Center (AITC).

### Mental Health Entries in the HL LOGICAL LINK file (#870):

|                                     |                     |
|-------------------------------------|---------------------|
| <b>YS GAF-SND</b>                   | LLP TYPE: MAILMAN   |
| DEVICE TYPE: N                      |                     |

## Mental Health MAIL GROUP file (#3.8) Entries

**YS ASI PERFORMANCE MEASURES** - Members of this mail group will be used to receive the ASI Case Finder Report.

**YS GAF TO NPCD** - This mail group is being used by Mental Health to transmit data to the National Patient Care Database via HL7.

REMOTE MEMBER: [XXX@Q-NPT.MED.VA.GOV](mailto:XXX@Q-NPT.MED.VA.GOV)

**YS GAF TRANSMISSION ACK** - This mail group will receive a message when a GAF score is transmitted to the National Patient Care Database or an error in the transmission has occurred.

**YS MHA-MHNDB** - This group receives error messages from the HL7 system when problems arise, sending messages to the Mental Health National database.

**YS PSYCHTEST** - Used to notify clinicians when tests and interviews are administered to patients at the requests of someone other than the person administering the test.

## Archiving

Data archiving capabilities are not currently available for the Mental Health package.

## Package Security

Security in this package is controlled almost exclusively by the menu option that is assigned to a person.

Deletion of entries in many Mental Health files is prohibited under ordinary conditions.

## Security Keys (file #19.1)

Allocate the following security keys to appropriate site personnel:

| Name | Description |
|------|-------------|
|------|-------------|

|                        |                                                                         |
|------------------------|-------------------------------------------------------------------------|
| <b>YSCL AUTHORIZED</b> | - The presence of this key designates an authorized Clozapine Provider. |
|------------------------|-------------------------------------------------------------------------|

**YSD** - Allows verification of ICD diagnoses. This is a clinical privilege. The chief of psychiatry will determine who may have this key.

**YSP** - Provides access to psychological test options. The Chief of Psychology Service will determine who may have this key.

**YSQ** - Allows verification of DSM-III diagnoses. The Chiefs of Clinical Services will determine who may have this key.

**YSZ** - Allows Mental Health technicians/aides to queue tests/interviews after completion.

### Parameters

New parameters allow a site to customize file names used by MHA on the client computer.

## **Parameter Definition (file #8989.51)**

MHA uses the following parameters to control where the software looks to find specific files:

**YS MHA\_A DLL NAME** - Specifies the name of the YS\_MHA\_A dynamic link library (DLL). This is the DLL that is invoked when a mental health instrument is administered via a CPRS Clinical Reminders dialog.

**YS MHA\_AUX DLL LOCATION** – Specifies the path and name for the MHA AUX DLL. This DLL is used by YS\_MHA.exe for scoring instruments. The parameter allows the DLL to be located at a particular location on the client computer or a network drive.

Use the **XPAR MENU TOOLS** option to view and edit parameter values.

## Glossary

This glossary contains definition of terms and abbreviations that may not be familiar to all users. Basic terms, acronyms, and phrases that are used throughout the Vista environment are included.

| Term                 | Definition                                                                                                                                                                                                                                                                                                              |
|----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| @                    | The at symbol (@) is used to delete an entry in a FileMan file.                                                                                                                                                                                                                                                         |
| ADT                  | ADMISSIONS DISCHARGES, and TRANSFERS (part of the PIMS package).                                                                                                                                                                                                                                                        |
| ABBREVIATED RESPONSE | Data entry by typing only the first few characters for the desired response. This feature will not work unless the information is already stored in the computer.                                                                                                                                                       |
| AXIS 4               | A numeric representation of the severity of psychological stressors.                                                                                                                                                                                                                                                    |
| AXIS 5               | A numeric representation of the global assessment of functioning. AXIS 5 is a clinician's overall judgment of a patient's social/psychological and occupational functioning on a continuum of mental health-illness.                                                                                                    |
| CRISIS NOTES         | A note containing patient information that displays automatically wherever the patient's name is entered into the system.                                                                                                                                                                                               |
| CROSS-REFERENCE      | An index of file entries. For a description see the VA File Manager documentation.                                                                                                                                                                                                                                      |
| DEFAULT              | A response the considered the most probable answer to the prompt being displayed. A default is identified by two slash marks (/ /) immediately following the computer-displayed response. You may accept the default answer by pressing the ENTER (or RETURN) key. To change the default answer, type in your response. |
| DELETE               | The key on your keyboard that enables deletion of individual characters. Place the CURSOR immediately after the last character of the string of characters you wish to delete and press the DELETE or RUBOUT key.                                                                                                       |
| DRG                  | DIAGNOSIS RELATED GROUP is a prospective payment system, based on a complex set of criteria, which established a reimbursement fee determined by the primary diagnosis. Each diagnosis is assigned a DRG number.                                                                                                        |

| Term                  | Definition                                                                                                                                                                                                                                                                                         |
|-----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| DUZ                   | A user identification number assigned by VistA. It is the IEN of the NEW PERSON file (#200).                                                                                                                                                                                                       |
| DX                    | Diagnosis.                                                                                                                                                                                                                                                                                         |
| DXLS                  | Diagnosis Length of Stay. The diagnosis most responsible for the patient's length of stay during the current admission.                                                                                                                                                                            |
| ENTER                 | Press the RETURN or ENTER key to instruct the system to store the information you just entered.                                                                                                                                                                                                    |
| FIELD                 | A FIELD is similar to questions on a questionnaire. It is a statement that requests information. Your response is the value entered into that field. For example, the prompt, "DOB" is a field in which you enter your birth date.                                                                 |
| GLOBAL VARIABLE       | Usually referred to as a global. A disc-resident structure (e.g. ^YTT(601), used to store data in the VistA database.                                                                                                                                                                              |
| HELP                  | Assistance displayed on your terminal screen. The HELP function displays menus and describes options. To obtain HELP, enter 1-4 question marks in response to a prompt. The level of help you receive increases with the number of question marks you enter.                                       |
| IEN                   | The INTERNAL ENTRY NUMBER of a record in a File Manager file.                                                                                                                                                                                                                                      |
| KERNEL                | The VA kernel is the software suite that integrates the operating system with other software applications such as Mental Health, Laboratory, and Pharmacy.                                                                                                                                         |
| LOS                   | Length of stay.                                                                                                                                                                                                                                                                                    |
| LEVEL                 | Patients are assigned a LEVEL, a scaled position. The definition of each level is up to the local station. For example, a level 1 patient may require staff supervision when involved in off-ward activities, whereas, a level 2 patient may leave the ward when accompanied by a level 3 patient. |
| MASTER TREATMENT PLAN | The comprehensive Treatment Plan for the TREATMENT of an individual patient during each hospitalization. The plan is reviewed at regular intervals and adjusted to accommodate the needs of the patient.                                                                                           |
| MH                    | Mental Health                                                                                                                                                                                                                                                                                      |
| MENU                  | A list of options that may include submenus or options.                                                                                                                                                                                                                                            |

| <b>Term</b>       | <b>Definition</b>                                                                                                                                                                                                                                                                                                                                                            |
|-------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| NOK               | Next of kin.                                                                                                                                                                                                                                                                                                                                                                 |
| ONSET             | The beginning of a symptom or disease.                                                                                                                                                                                                                                                                                                                                       |
| OPTION NAME       | The formal name of an option. By convention, it is displayed in brackets and is the .01 field of the OPTION file (#19).                                                                                                                                                                                                                                                      |
| PATIENT MESSAGE   | Information concerning a patient that is not part of the permanent clinical record. If a message has been entered for a patient, a notation indicating that a PATIENT MESSAGE exists is displayed every time the patient's name is entered into the system. A Patient Message may be transferred to a Progress Note where, it becomes part of the permanent clinical record. |
| PRIMARY           | The condition that is chiefly responsible for the DIAGNOSIS the patient's treatment.                                                                                                                                                                                                                                                                                         |
| PRIORITY CATEGORY | Codes used to denote the order in which a patient's acceptance into a program or clinic is determined.                                                                                                                                                                                                                                                                       |
| PROGRESS NOTES    | A note containing information concerning a patient. There are numerous kinds of progress notes such as admission, discharge, pre-operative, social work, nursing, etc. A progress note is included in the patient's permanent clinical record.                                                                                                                               |
| PSYCHOSIS         | Gross impairment in reality testing.                                                                                                                                                                                                                                                                                                                                         |
| PROMPT            | The system interacts with the user by issuing questions and statements called PROMPTS, and the user enters a response.                                                                                                                                                                                                                                                       |
| SIGNATURE BLOCK   | Used with electronic signatures. A SIGNATURE BLOCK indicates the author's complete name and title.                                                                                                                                                                                                                                                                           |
| SSN               | Social Security Number.                                                                                                                                                                                                                                                                                                                                                      |
| TEAM              | An organizational sub-unit of a ward which is often composed of residents, medical students, psychologists, social workers, nurses, etc.                                                                                                                                                                                                                                     |
| VA FileManager    | The database management system (DBMS) used by Vista. It is often referred to as FileMan.                                                                                                                                                                                                                                                                                     |
| VERIFY CODE       | An additional security precaution used in conjunction with ACCESS CODE. Like the access code, it is also 6-11 digits in length and if entered incorrectly, the user is not allowed access to the computer. Both codes are invisible on the terminal screen to provide user-protection.                                                                                       |

## APPENDIX A

---

The Mental Health package contains a number of software elements that were deprecated (marked as obsolescent) in 2004 or earlier. These software components are deleted or disabled in Mental Health Patch 60 (YS\*5.01\*60). The following is a description of those items which will become obsolete with the release of Patch 60.

The obsolete software may contain scoring algorithms that are no longer correct, outdated data structures, and code that doesn't meet current VA software standards and conventions.

### Files Deleted by Mental Health Patch 60

| File Name            | File # | Global Location |
|----------------------|--------|-----------------|
| MEDICAL RECORD       | 90     | ^MR (           |
| PT. TEXT             | 99     | ^PTX (          |

| DSM CONVERSION       | 627.99 | ^YSD(627.99,    |
| YSEXPRT              | 628    | ^YS(628,        |

### Options Deleted by Mental Health Patch 60

1. YS SITE-FILE 16 - SIGNATURE....Edit Signature Block Title
2. YS SITE-FILE 602 TEST LIM - INSTRUMENT...Edit Instrument Restart Day Limit
3. YS SITE-FILE 602 WWU - WWU.....Edit Weighted Work Unit (WWU)
4. YSADMTEST - Psychological tests/interviews (administer)
5. YSAPROB - Add a new problem
6. YSAS CASE FINDER - ASI Case Finder
7. YSAS FOLLOWUP FINDER - ASI Followup Finder
8. YSCENCAD - Cancel a MH Census Discharge
9. YSCENCL - Custom List
10. YSCENCRISIS - Crisis notes and Messages

11. YSCENDAYHX - Previous Admissions by Date
12. YSCENDCDOC - Discharge Comments Entry
13. YSCENDIA - Active Diagnoses
14. YSCENED - Enter/Edit Current Inpatient Data
15. YSCENEDM - Enter/Edit MH Inpatient Data
16. YSCENFS - Census
17. YSCENGED - Group Data Entry/Edit
18. YSCENIL - Individual Patient List
19. YSCENLOS - Current Inpatient Days
20. YSCENMAIN - Inpatient Features
21. YSCENMEDS - Outpatient Medications
22. YSCENMGR - Inpatient Features management functions
23. YSCENNAM - Name Search
24. YSCENNEW - Recent Admissions
25. YSCENPAHX - Individual Data Look Up
26. YSCENPASS - Pass/Last Transfer List
27. YSCENPL - Patient Lists
28. YSCENPP - Patient Profile Data
29. YSCENREM - Graph of Patients Remaining
30. YSCENROT - Rotation of Teams
31. YSCENSL - Short Patient List
32. YSCENSUBUP - Team Definition
33. YSCENTAH - Team Admissions Record
34. YSCENTCEN - Team Census
35. YSCENTESTING - Psychological Tests and Interviews
36. YSCENTMHX - Ward/Team History - LOS, DRG and DXLS
37. YSCENTPTE - Treatment Plan Tracking data entry
38. YSCENTPTP - Treatment Plan Tracking Report
39. YSCENUNITUP - Ward Definition
40. YSCENUNT - Group Data Lookup
41. YSCENWDM - Statistics
42. YSCENWL - Work List
43. YSCLERK - Clerk-entered tests
44. YSCOMMENT - Append comments to tests and interviews
45. YSCRISNOT - Crisis note
46. YSDECTREES-R - Decision Tree Shell
47. YSDIRTEST - Staff entry of tests/interviews
48. YSEPROB - Edit a problem
49. YSEXTESTS - Exempt psychological tests
50. YSFPROB - Formulate new problem list
51. YSGAF CASE FINDER - GAF Case Finder
52. YSHX1 - History - present illness
53. YSHXPAST - Past medical history
54. YSHXPASTR - Past medical history (results of pt. report)
55. YSINST RESTART LIMIT - Edit Instrument Restart Limit
56. YSIPROB - Inactivate an active problem
57. YSJOBINQ - Inquire to job bank
58. YSJOBKILL - Purge job bank
59. YSJOBLIST - Search job bank
60. YSJOBUPDATE - Update job bank
61. YSMANAGEMENT - General Management
62. YSMLST - List Tests & Interviews
63. YSMOVP - Move crisis notes and messages
64. YSPATMSG - Patient message
65. YSPATPROF - Profile of patient
66. YSPERSHX - Psychosocial history
67. YSPERSHXR - Psychosocial history (results of pt. report)
68. YSPHYEXAM - Physical exam
69. YSPLDX - DSM Diagnosis (Problem list)
70. YSPLPDX - ICD9 Diagnosis (Problem list)
71. YSPPROB - Print the problem list
72. YSPRINT - Tests and interviews (results)
73. YSPROBLIST - Problem list

- 74. YSPTINSTRU - Patient-administered Instruments
- 75. YSRAPROB - Reactivate an inactive problem
- 76. YSREVSYS - Review of systems
- 77. YSREVSYSR - Review of systems (results of pt. report)
- 78. YSRFPROB - Reformulate a problem
- 79. YSRSPROB - Resolve a problem
- 80. YSTESTBAT - Test battery utility
- 81. YSVOCATIONAL - Vocational Rehabilitation
- 82. YSWAITCR - Create/edit wait lists
- 83. YSWAITE - Add patient to wait list
- 84. YSWAITEDI - Edit patient list data
- 85. YSWAITLST - Wait lists
- 86. YSWAITP - Print wait list
- 87. YSWAITREM - Remove patient from list
- 88. YSWAITSHUF - Move patient on list
- 89. YT SF36 HEALTH SURVEY - SF-36 Health Survey
